**DETAILED ACTION**

***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-21 & 29-36, drawn to a method of recording compatibility information on a recording medium, a recording medium, and a recording/reproducing apparatus, classified in class 369, subclass 59.25.
- II. Claims 22-28, drawn to a method of determining compatibility between a recording or reproducing medium and a recording/reproducing apparatus, classified in class 369, subclass 53.11.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination.

The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as being utilized in a device which does not require that the extended part version information recorded in the reserved zone includes a primary digit in the reserved zone as required by the invention I. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was not made to applicant's representative to request an oral election to the above restriction requirement due to the nature of the application, e.g., foreign applicant, and the need for the examiner to promptly act on the application.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Paul Huber whose telephone number is 703-308-1549.
